Mid-level Full Stack Web Developer with 5+ years of experience building and maintaining responsive web applications using PHP, Laravel, Vue.js, and JavaScript. Proven track record in leading feature delivery, mentoring junior developers, and modernizing legacy systems. Adept at translating business requirements into scalable, high-performance solutions and thriving in fast-paced, collaborative environments.

PROFESSIONAL EXPERIENCE

Firefly Electric Lighting Corporation, Manila City

Mid Software Engineer – Web Developer

JANUARY 2026 – PRESENT

- Mentor junior developers through structured code reviews, architectural guidance, and hands-on debugging support, accelerating team skill development.
- Participate in technical decision-making for feature implementation, stack improvements, and system architecture enhancements.
- Collaborate directly with process owners and stakeholders to translate business requirements into scalable technical solutions, leading feature delivery from requirements gathering through deployment.
- Develop and maintain in-house web applications aligned with business requirements; designed and implemented responsive front-end and back-end architecture ensuring optimal performance and user experience.

Technologies used: PHP, Laravel, JavaScript, CodeIgniter, Vue.js, jQuery, Bootstrap, HTML, CSS, Git, Docker, Python.

Junior Software Engineer – Web Developer

OCTOBER 2022 – JANUARY 2026

- Developed and maintained multiple in-house web applications serving company-wide business operations, aligned with stakeholder requirements.
- Designed responsive front-end and back-end web architecture ensuring optimal performance and user experience.
- Proposed and led a technology upgrade initiative to modernize the company's web application stack in line with industry standards.
- Collaborated with cross-functional teams to gather requirements and deliver effective technical

solutions.

Career Break – Family Caregiving & Self-Directed Learning

JUNE 2021 – SEPTEMBER 2022

- Took a deliberate career break to serve as primary caregiver for an ill family member, demonstrating responsibility, resilience, and commitment.
- Used available time for self-directed learning, deepening knowledge in web technologies and frameworks to stay current with industry developments.

Ally Techno Grit Solutions Corporation, Estrella Makati City

Junior Software Developer

AUGUST 2019 – MAY 2021

- Contributed to a fast-paced startup environment (4-person team), rapidly building and maintaining web applications across multiple client projects simultaneously.
- Delivered technical support to end-users, diagnosing and resolving application issues to minimize downtime and maintain client satisfaction.
- Collaborated with senior developers to implement new features and improve existing functionality.
- Participated in code reviews and quality assurance processes.

Technologies used: PHP, Laravel, CodeIgniter, JavaScript, jQuery, Vue.js, Bootstrap, HTML, CSS, Git.
